6th Annual Hartford HealthCare Shock Symposium

**June 5th
Farmington Polo Club**

Education | Networking | Data

Objectives

- Describe characteristics of a patient in shock.
- Identify features for a patient requiring inter-facility transfer that suggest the need for expedited transfer.
- Describe the indications and contraindications for targeted temperature therapy post cardiac arrest.
- Identify key emotional and psychological features in the caring of critically ill patients from a patient and provider standpoint.
- Discuss the pharmacologic implications of ECMO on medication administration.
