

# Diabetes LifeCare Symposium

Thursday, November 7, 2024

9:00 am- 2:00pm

*Hartford Hospital, Heublein Hall  
Education and Resource Center  
560 Hudson Street, Hartford  
or via Zoom*

**Activity Goal:** Our objective is to provide the latest information in diabetes management and treatment advancements for providers and healthcare professionals in the primary care space. The symposium will feature the role of medications such as GLP-1, SGLT2 and insulin therapy in diabetes management, and the most up-to-date information on continuous glucose monitoring and automated insulin devices. A panel discussion will help identify patients appropriate for insulin pump therapy. Important aspects of eye and foot care management will be discussed. Each session will equip providers with practical knowledge and skills that will enhance their practice and improve patient outcomes.

**Target Audience:** Physicians, advanced practitioners, dietitians, pharmacists

## Topics:

Latest on Sensors; Automated Insulin Devices  
Type 1 Diabetes Mellitus & Insulin Therapy  
Role of GLP-1 & SGLT-2 in Diabetes Management  
Pump Therapy: Who is Appropriate?  
Eyes: What We See in Practice

**Cost:** \$30, [Click here to register](#) or scan the QR code
