

# ***RECORD MY ATTENDANCE FEATURE CLOUDCME MOBILE APPLICATION***

## **Temporary Suspension, Effective 05.16.2022**

The ability to record attendance utilizing the HHC Continuing Education (CE) CloudCME mobile application will need to be temporarily suspended as of THIS MONDAY, 05.16.2022. Unfortunately, we recently discovered this feature has a flaw that bypasses any required evaluations and/or post-tests. This process is non-compliant with the required Joint Accreditation criteria.

The HHC Continuing Education team has worked with the vendor of the CloudCME software and mobile app in attempt to resolve this issue; however, there is no timeline for resolution. This software issue affects all CloudCME customers across the country.

To maintain compliance with our accrediting body, we will temporarily suspend the ability to record attendance through the mobile app and will promote the use of the texting function to record attendance (see below). The mobile app will otherwise remain active to support other functions such as audience response and reviewing of transcripts.

As soon as the software issue is resolved, we will re-activate this feature.

Thank you for your support of HHC Continuing Education. Please reach out to [ContinuingEd@hhchealth.org](mailto:ContinuingEd@hhchealth.org) with any questions.
